Sequence 11, Application US/08135929A

Patent No. 5593959

GENERAL INFORMATION:

APPLICANT: Miller, Jonathan L.

APPLICANT: Lyle, Vicki A.

APPLICANT: Finch, Clara N.

APPLICANT: Pincus, Matthew R.

TITLE OF INVENTION: Mutations in the Gene Encoding the TITLE OF INVENTION: Mutations in the Gene Encoding the TITLE OF INVENTION: Mutations in the Gene Encoding the NUMBER OF SEQUENCES: 11

CORRESPONDENCE ADDRESS:

ADDRESSEE: Nixon, Hargrave, Devans & Doyle

STREET: Clinton Square, P.O. Box 1051
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      seq_name: /cgn2_6/ptodata/2/iaa/5A_COMB.pep:US-08-135-929A-11
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              COUNTRY: ...

ZIP: 14603

Sequence 23, Application US/09171461

Patent No. 6335016

GENERAL INFORMATION:

APPLICANT: Baker, Adam

APPLICANT: Cotten, Matthew

APPLICANT: Cotten, Matthew

APPLICANT: Kurzbauer, Robert

APPLICANT: Kurzbauer, Robert

APPLICANT: Chicken Embryo Lethal Orphan (CELO) Virus

TITLE OF INVENTION: Chicken Embryo Lethal Orphan (CELO) Virus

CURRENT APPLICATION NUMBER: US/09/171,461

CURRENT FILING DATE: 1999-01-12

ERALIER APPLICATION NUMBER: PGT/EP97/01944

EARLIER FILING DATE: 1997-04-18

NUMBER OF SEQ ID NOS: 54

SOFTWARE: Patentin Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        seq_documentation_block:
